Royal Insurance Company.

FIRE AND LIFE.

CAPITAL TWO MILLIONS STERLING.

This important company, in many respects the greatest of its kind in the present age, has appointed an agency in this city. The head-offices are in London and Liverpool with branches in Dublin, Edinburgh, Glasgow, Manchester, Bristol, Birmingham, Sheffield, Leeds, Newcastle, Southampton, Montreal, Toronto and other cities.

The ROYAL is remarkable; for the promptitude and liberality of its settlements: for the largest life bonuses (£2 per cent per annum) ever continuously declared during 15 years by any Co.; for the enormous extent of its transactions, shewing £ 00 000 in new life assurances for 1862, and a Fire revenue of £300,000 per annum; for its security, which has given rise to the proverb "as safe as the Royal;" for the accumulated funds in hand, over one million sterling; for its annual income, over half-a-million sterling; and for the correct calculation of its mortality tables. Hence the English press of all countries, including over 90 leading papers, speaks in the highest terms of this company.

The report for 186, shews that "all the property of the Co. amounting to £846 070 is real and substantial property:" the amount now exceeds one million sterling. The increase, during 14 years, on Fire business was 900 per cent, and on Life 1350 per cent.

MESSRS. H. A. GREEN AND Co. are authorised to issue policies for Fire and Life to a very large amount, at moderate premiums, the Co. being anxious to extend its foreign business, which already shews an annual revenue of £200,000. Life claims can be settled without reference to England. For further particulars please apply to

Rams—Rams—Rams.

The undersigned, in calling attention to his large and superior stock of Rams and Breeding Sheep, begs to inform his Friends in the Camp that he has on hands a splendid collection of animals, from Three Hundred to Five Thousand Dollars, upwards, and is confident that each in its class will compete with anything in the province.

In the "Rambouillet type" will be found some fine specimens of the pure blood, besides crossings from the "Merino," possessing the size, shape, and length of staple for which this class is so much admired.

In the "Negretta" he has also some beautiful animals of pure blood, as likewise the "Negrette" drawn from the "fine Merino," a "Cria" remarkable for compact shape and close heavy wool.

In addition to the above he wishes to draw especial attention to his celebrated Argentine breed, between the "Rambouillet" and "Negrette Ewe," and which, after seven years' experience, he can fully recommend as combining size and shape with length and weight of wool—qualities so anxiously looked for by all experienced sheep-farmers, and which have given so much satisfaction to those who have already purchased of this class. In buying the above in half three-quarter, and pure blood, already acclimatized, there is an immense advantage, as Rams reared in this country are not so delicate and withstand the winter better than imported animals, besides being sold much cheaper, and only requiring ordinary care.

He can likewise supply the above classes in Ewes, either picked or by the hundred, and wishes to remark that all have been in prime condition throughout the past summer.

CAUTION.—The Patentees having established the validity of their Patent, in an action tried on the 20th and 21st days of June instant, in the Court of Common Pleas at Westminster, before Lord Chief Justice Erle and a Special Jury, in which Ellwood and another, of No. 24 Great Charlotte st., Blackfriars Road, in the Borough of Southwark: Wholesale Hat Manufacturers, were Plaintiffs; and Christy and others, of No. 35 Gracechurch-street, in the City of London, also Wholesale Hat Manufacturers, were Defendants; and the Jury having by their verdict found that the above-named Defendants had infringed the Plaintiffs' Patent, and that the invention was new in England and in India at the date of the Letters Patent—We, the above named Plaintiffs, do hereby give notice to all Manufacturers, Dealers in, and Sellers of Hats, Caps, or Helmets, that we shall proceed by suit in Chancery against all persons so manufacturing, dealing in, or selling Hats, Caps, or Helmets, constructed on the principle of "Ellwood's Patent Air Chamber Hat," unless the previous consent of the Patentees be obtained, at the same time reserving to ourselves the right of taking proceedings against prior infringers.

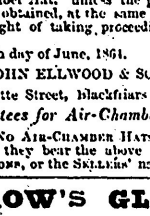
BENSON'S WATCHES AND CLOCKS.

Watch and Clock Maker, by Special Appointment, to His Royal Highness The Prince of Wales.

Opinions of the London Press upon Benson's Great Clock and Watches in the Exhibition, 1862.



"As a sample of English clock work on a large scale, the works of this are probably the finest finished that have ever been seen in this country. No Chronometer could be fitted with more perfectness or carefully adjusted mechanism."—Times, June 11 1862.

"A triumph of ingenuity."—Telegraph March 11 1862.

"A more splendid and exquisitely finished piece of mechanism we have never seen." Standard, June 17 1862.

"Some of them are of great beauty and if the English watch-trade only follow up with the same spirit and success this first attempt to compete with foreigners in decorative watches, there seems to be no reason why we should not get the trade entirely into our own hands."—Times, June 23, 1862.

"Ranged around the base of the clock were the Watches which Mr. Benson exhibited, and which have been universally admired for the beauty and clearness of the designs engraved upon them. The movements are of the finest quality which the art of horology is at present capable of producing. The clock and watches were objects of great attraction, and well repaid the trouble of an inspection." Illustrated London News, November 8, 1862.

OLD WALLS.

The municipal abuses which exist in Buenos Ayres are so notorious, and the chances of reform so remote, that it is almost waste of time to advert to the matter. In vain we have called attention to the stagnant pools and hideous quagmires in the back streets of the town. Fever, small-pox and other diseases rage with the greatest virulence in these places; the hospitals are full to overflowing, but no one thinks it is the municipal neglect which is causing all these epidemics. The warm season is now approaching, the time when pestilential vapors are most dangerous, and yet instead of introducing measures for the better cleansing of the city, we have the municipal body engaged in discussing constitutional questions.

It appears to us that Buenos Ayres would be a healthier and better regulated city if there was no municipality at all, for then the house-holders could club together and have those pantanos filled up.

But our attention to municipal neglect has been aroused not by stagnant pools or fetid offal in the streets—these nuisances murder people only slowly and by degrees,—we refer now to the dangerous state of some of the old walls in this city, and which, when we least expect, will some day tumble down and kill a whole neighborhood. On last Saturday night a large portion of an old wall at the foot of calle Bolivar fell in. Luckily it was in the outskirts of the city and caused no loss of life; but in many parts of calle Defensa and other streets there are walls equally dangerous as the one which fell: hundreds of persons pass beside them daily little thinking of the extreme danger they incur. There is an old wall on the hill at calle Buen Orden, beneath which hundreds of pedestrians pass daily; according to all the laws of gravity it should have tumbled down long ago. Some of these days it will come down with a crash, but of course the municipality will not interfere; probably the members regard this wall as a sort of Argentine curiosity.

The city of Buenos Ayres is a modern town, and though it may boast of ruins at least it is destitute of antiquity; yet, notwithstanding that three-fourths of the buildings in town are hardly twenty years old, they are crumbling away. House property in Buenos Ayres instead of being the best, most lasting and securest, is the most perishable of all investments. Great as is the amount of money spent in building new houses in this city, the sums expended in repairing old ones is greater still; and if people want to know the cause of this, we tell them because a good first class builder is the most difficult thing to find in Buenos Ayres; the bricks are bad, the mortar is inferior. The master-builders are for the most part enterprizing Basques and Italians who began life with a hod on their shoulder. These are the men who now construct the palaces of Argentines! Is it any wonder we ask that in a few years the stateliest mansion is a tumble down old house? Why, a plain garden wall can't stand straight for more than a couple of years, and a house to be at all durable must have the walls a yard thick.

The English builders are so completely driven out of the market by their Italian and Basque rivals that the few who were here had to take to sheepfarming for a livelihood, but Buenos Ayres has lost by the competition, for the few English-built houses which can be shown stand an undeniable proof of the superiority of their construction. We cannot, therefore, be surprized that scarcely a street in town is without its zig-zag wall, but we are astonished that the Municipality of Buenos Ayres does not order all those old walls to be pulled down, so as to arrest disasters which appear inevitable, if proper measures be not at once taken.

EDITOR'S TABLE.

The steamer arrived yesterday from the Uruguay, but brought no fresh news about Flores. Passengers state that his forces now amount to some 4,500 men, and that he finds it hard to get enough of cattle in the neighbourhood of Paysandu.

To-day at two o'clock the new steamer Estrella del Norte, will be launched at Mr. Marshall's shipyard in Barracas. A select number of friends have been invited.

On Sunday evening a man was stabbed in the stomach in Calle Reconquista, between Calles Tucuman and Parque. The would-be assassin, we are happy to say, was apprehended, and is now in the Carcel.

Another Brazilian war-vessel, from Rio Janeyro, arrived yesterday, called the Recife. She brings no later dates than the packet from Rio.

The new steamer, Rio de la Plata, which arrived in Montevideo the other day from Glasgow, comes out consigned to the London and River Plate Bank. She brought some 20 passengers, and will sail under the English flag. The bank only advanced the money to the company to build her, and we do not think that it will run her on its own account, as the steamboat business is not, we apprehend, within the sphere of banking operations.

Respecting the new loan to the Oriental Government, which we mentioned the other day, it appears that the Minister proposed the loan on the terms which we published, but the manager of the English Bank declined the business.

We have received an interesting pamphlet, written by a Mr. Patrick Matthew, on the Schleswic-Holstein question, from which we purpose to extract.

A great race was run on Sunday in Barracas. The run was from the Tres Esquinas to the Banderita. A crowd assembled in the street to watch the race, although the stakes were extremely insignificant. Barracas was crowded on Sunday, and several big wigs were seen walking in the Calle Larga. There was a story current that one of the national ministers had come down, and that Mr. J. C. Ocampo, having suggested an impromptu 'asado,' he and the minister started off in search of an 'asador,' which they at last found. All Barracas was talking of the ministeral 'asado.'

In front of the Post-office a carriage came to grief on Sunday morning, the wheel having come off; the coachman was pitched head over heels on the side walk. An Englishman passing by stopped the horses and opened the carriage door just in time to save the two affrighted gentlemen inside.

The steamer Fairy is put on the Uruguay line. She will now sail under the Portuguese flag, and will call at Colonia. She leaves Montevideo every Monday for the Uruguay, calling ay Buenos Ayres and all the other ports.

On next Thursday Captain Mancilla's tragedy, 'Atar Gull,' will be performed in the Victoria. It will be a benefit night.

Last night the Provincial Chambers again took up the paper dollar question. The law authorising the sale of the railway has finally passed the Deputies, and will now go up to the Senate. The bill for selling the 800 leagues of land was to have been taken up last night. It will meet with great opposition in both houses, and many are of opinion that the Government will be defeated on this bill, as the estancieros are strong in both houses.

The greatest excitement reigns in Mercedes respecting building lots in the vicinity of the new station house, which we learn will be in the quinta of Solveyra. The rails are not yet laid out as far as Mercedes—they reach about three leagues farther than Luxan. This week the new station house in Mercedes is to be begun: it will be a larger and more capacious building than that of Luxan, and will have deposit warehouses.

The Lobos Railway is in *statu quo* and the people interested in the construction of the road are greatly disheartened at the Government proposing to sell the Western Railway. Some parties, we hear, who have a map of the projected branch, are out busy in the camp trying to get free grants of the land from the owners. If they succeed in that, a company will be started in this city for the purpose of making the road.

The Church of Santo Domingo was crowded on Sunday—all the fashion of town attended—the Cathedral and other churches were completely deserted. In Merlo there was a great "funcion" also, but we have not heard how it went off.

The number of vessels laden with railway iron now arriving in the River Plate is quite astounding: scarcely a day passes that one or more vessels do not come in for some of the companies. There are at this moment some twenty vessels discharging railway iron in Buenos Ayres and Rosario. When all this railway iron will be paid for, we should like to know.

The Peruvians have built a monitor, which was launched at Callao on the 31st July. It will have a tower and be completely covered with iron plates, everyway similar to Erriesson's celebrated Monitor. When she is finished she will leave for the Chincha Islands, "to chaw up Pinzon."

A friend from Rosario has sent us a new kind of bank-note, issued by a certain M. Casado. Persons wishing to inspect this novel paper money will please call at our office. We wonder what Minister Gonzales says to this new emission! M. Casado is a broker, we hear, in Rosario, and has, we imagine, no greater right to emit his paper money than ourselves.

THE RIACHUELO BRIDGE.

The most important and tedious work on the Great Southern railway is the Barracas bridge, about which some particulars may be interesting. The six cylinders are now very deep, having reached a bed of hard sand some 30 feet down, and within ten feet of their destination. The principal one on each side is nine feet in diameter, inside which two men are constantly at work and sometimes have to beat a hasty retreat owing to the rise of water in the tube.

The testing of the cylinders will be made with a weight of 500 tons, the calculation being as follows: weight of the superstructure 240 tons, do train 10 tons: test 1½ tons per foot (the bridge is 168 feet) 250 tons. This weight of 500 tons will be a maximum exceeding any that can be brought to bear on the bridge, as the ratio 1½ tons per foot is greater than even a train of locomotives placed the entire length. The bridge will be about 10 feet over high-water level. Ballast trains are running daily from Barracas to Lomas.

CONCEPCION.

By the Salto arrived yesterday we have received the 'Uruguay' to the 1st inst. There is no news except a number of notices about the sale of public lands. The Yateman protest is published. A man named Guillermo Diaz has been sentenced to 15 days' public works for stabbing a soldier at Victoria: a fellow named Albornoz to 25 days' work for being accomplice in a murder.

CORRIENTES.

The 'Nacion' of Sunday publishes a long communication from Corrientes in answer to our censure of the Legislature of that province relative to the Maua banks project. The writer forgets that we blamed the Deputies not for rejecting the project but for refusing to discuss it or even allege any reason for throwing it out *in limine*. Their conduct is both inexplicable and unjustifiable. If they had put Mr. Ingonville's project in debate, we might then be informed what are the usurious conditions complained of? Nevertheless as we have no interest in the Maua project, but a lively wish to abolish all paper money, and promote industry in that province, we will graciously forgive the Legislature of Corrientes and declare the members well-deserving of their country, if they conclude the contract with Lanuz and others, to the same effect, which will produce immense good to Corrientes. Our friends in that city have at least to thank us for calling public attention to the matter, and if the terms now proposed be more advantageous we shall feel only too happy. As for Mr. Sarsfield's opinion about Maua's conditions, we do not value it: his name in banking matters is inauspicious, and should be carefully avoided when paper money is in question.

PUBLIC LANDS IN SANTA FE.

The 'Ferro Carril' of Rosario publishes a very interesting law, authorising the Government to sell public lands, to the amount of $70,000 Bolivian dollars, said lands not to be sold in lots of less than three square leagues.

The price of pasture land between the Arroyo del Medio and the river Carcaraña, within eight leagues of the coast of Parana, in the district of Rosario, is to be $4,000, silver, per square league, and those beyond said limits shall be $3,000, including those fronting the Rio Carcaraña: and two thousand dollars all others. The grain-growing lands between the Arroyos Ledueña and Saladillo, and not distant more than one league from the Plaza of the city of Rosario, shall not be sold for less than two patacons per yard of 'frente' to 100 of 'fondo.' Those which are beyond the limit aforementioned, shall be one patacon per 'vara.'

Those lands, which shall be within the precincts of the city of Rosario, shall not be sold for less than fifteen patacons the vara 'frente,' by fifty 'fondo.'

Those of the same class in the Villa Constitucion, San Lorenzo, Coronda, Santa Fe, or any other town, shall have the minimum of five patacons per vara 'frente,' and fifty 'fondo.'

PROPOSALS FOR BUILDING A BRIDGE OVER THE SALADO.

The "Ferro-Carril" publishes the proposals sent to the Government for the building of a bridge over the Rio Salado at the Paso Minhura. One is by Messrs. Claus & Muller, the other by Señor Larrachea, which the "Ferro-Carril" advises the Government to accept, as being the clearer and more advantageous of the two. The bridge is to be iron, of the class generally used in Europe, and the toll is to be the same as that charged on the bridge at the Crucesila. The privilege is to be for twelve years and no other bridge is to be constructed within a league of it either way. After the expiration of this term it is to remain for the benefit of the Province. All Government forces are to pass free of toll, and the bridge is to be ready within two years from the day of this concession.

NEWS FROM PERU AND CHILE.

The Chilian mails to September 1st arrived in town on Saturday, but the Valparaiso papers having suspended exchanges with the 'Standard,' we have gleaned the news from Sunday's journals.

The prospects of Peru could not well be worse. There is not the least hope of an honorable arrangement, or of the expulsion of the Spanish intruders. None of the sister republics seem inclined to make common cause with the cabinet of Lima; the protests sent to European courts have met with a cold rebuff everywhere, and to crown the misfortune a spirit of dissension among the Peruvians themselves threatens to reduce the republic to a theatre of civil-war.

Four months having elapsed since the seizure of the Chincha Islands, without the least effort on the part of Government to attack the small Spanish force, the populace has grown impatient and thirteen members of the Chamber of Deputies accused the ministry of Lima, of treason to the state. President Pezet formed a new Cabinet out of the thirteen accusers, who express a determination to wage active hostilities; with what success time will show. The agents sent to England and North America for military and naval supplies cannot return before next year, by which date Admiral MacMahon will have an imposing fleet of twelve men-of-war in the Pacific, to defy the forces of the Republic. The Monitor so much spoken of has at last been launched, but only in the shell, and a serious difference arose between the builders (who are all landsmen) and the naval officers. No war vessel or merchant steamer could be got to lend assistance; the naval officers insisted on the dismissal of Messrs. Ramos who had constructed the Monitor, and the appointment of Sor. Backus in their place, seeing which the operatives took the vessel actually on their shoulders and pushed her into the water: the machinery was to be put in afterwards. Besides the discontent in the Chambers and among the navy, General Castilla (from whom great things were expected) has taken disgust and retired from Lima, charging the President with exerting an oppressive influence over the Deputies. The relations with neighboring republics augured ill for any hope of aid against the Spaniards.

Ecuador has been invaded by some filibusters said to be in the pay of the Peruvian Government, for the refusal of the Cabinet of Quito to take part with Peru. On the 21st of July a band of 120 armed men came from Peru into the province of Manabi, to make a revolution, but the Governor, with 80 men, went to meet them, and at the first bayonet charge the filibusters fled precipitately, leaving some arms and wounded on the ground. To guard against surprise the Government of Equador was enlisting men, and the fortifications of Guayaquil were being repaired.

Chile expresses strong sympathy with Peru, at least in the press, but since the last expedition of *twenty-three* volunteers from Valparaiso, we hear of no material assistance. In fact, it is pretty certain that the Republic will not declare war against Spain. Ex-President Montt has been despatched to Lima as plenipotentiary. The official journal advises Peru "to imitate the King of Denmark, and lay down arms, so that Spain may not have the honor of a victory after the semblance of fighting on the part of Peru."

Bolivia is apparently recovered from the fever of martial preparations lately mentioned, and the troops have either retired into winter quarters for the ensuing *summer*, or the call was never responded to. If they really intended to fight the Chilians about the old-sore Mejillones, it is likely they have postponed the project. Everything is quiet at La Paz.

The Peruvian Government, not counting on the justice of its case (Talambo), or of aid from its neighbors, sent a circular petition to the European powers, which in most instances is yet unanswered, and has called forth a freezing rejoinder from England, France and Italy.

In reply to the English guano merchants, Earl Russell says "that he regrets the circumstances alluded to in the petition, but trusts no injury will result to British interests, as he understands the affair is in a way of settlement."

The Foreign Minister at Paris, answering the Cabinet of Lima, "regrets the difficulties which have arisen in M. Mazarredo's mission, but declines offering an opinion in the matter, since the friendly offices of France have been unsuccessful. Hoping that moderation will rule the councils of Lima and Madrid, and lead to a mutually honorable agreement, he remains, etc."

The Italian Secretary of Foreign Affairs, under date, Turin, June 7th, "acknowledges receipt of despatches from Lima, 27th April, and thanks his Excellency."

The insolent brevity of the Italian Minister is the more surprizing as Italy has a grudge against Spain for refusing to acknowledge Victor Emmanuel King of Italy: but there seems a determination in all Europe to allow Spain to chastise the assassins of Talambo; and until the murderers of the poor Basques be executed, there is no room for an arrangement, nor any security even for the city of Lima, against the Spanish avengers.

The Chilian press states that Napoleon urges Spain to strong measures, and not to offer any arrangement; it is more likely that the attempt to assassinate Mazarredo determined Queen Isabella to despatch Admiral MacMahon to hold the Chinchas permanently. A pamphlet published at Lima states that the commander of H.B.M.'s S. "Leander," has positively contradicted the attempts on the Spanish envoy, but this is absurd. A letter in the "Mercurio" announces that the last mail from England brought offers of a loan of eight millions sterling to the Peruvian Government, for bonds to be issued at 82, with 2 p% annual sinking fund, and that President Pezet felt disposed to accept it. Some American workmen had arrived at Callao, to be employed on naval works. The three Spanish vessels were still at the Chinchas, and had not yet been reinforced.

The Italian Government countermanded the frigate Umberto, enroute for New York, and despatched her to the Pacific: orders have also been sent to the Italian war vessels at Rio and the River Plate to leave for the same destination. Sig. Canevaro, son of the ex-Consul at Lima, has left Genoa, to offer his services to Peru: Marshal Santa Cruz also, in a letter from Versailles, 31st May, offers his sympathies to President Pezet, who entertains the chimera of an American Congress.

Señor Lastarria has been ordered to proceed to Buenos Ayres as Chilian envoy, but will not leave Santiago until the snows of the Andes abate, and render the journey less perilous than at present. This gentleman proposed in the Chilian Chambers the non-recognition of the new Empire of Mexico, and a rejection of all European interference in American affairs: it was accepted.

The Congress of Lima has voted medals to several patriotic volunteers, ordered the monitors to be named Victoria, Los, and Apurimac, and sent Don Benigno Vijil as Minister for Peru in Buenos Ayres.

SPAIN AND PERU.

The following are said to be the terms of arrangement irrevocably laid down by the Spanish Government in the question with Peru, and presented to D. Mariano Moreira, Peruvian Consul at Madrid:

1st. The Republic of Peru shall send a special diplomatic agent to Madrid to declare solemnly in the name of his Government as follows:

I.—That the Government disapproves the attempts made by the authorities of Callao to seize M. Mazarredo's secretary, and will dismiss all said authorities.

II.—That the Government neither incited nor took part in the outrages by Peruvians against M. Mazarredo in his journey from Callao to Panama and Aspinwall, and that it will punish the authors of same.

2nd. The Spanish Government will send an agent to Lima to demand justice in the affair of Talamabo; he shall have powers similar to those of M. Mazarredo, and be received by the Peruvian Government.

3rd. Immediately after his reception the Chincha Islands will be surrendered to a commissary named by the Peruvian Government.

MEXICO AND SAN DOMINGO.

The Peruvian mails contain news of Mexico similar to the imaginary victories over the French which they so often invented. General Uraga has not submitted to Maximilian, but published a manifesto to his troops vowing never to lay down arms till the country is free, and "war to the knife against the French and all traitors." The new emperor offered to make Juarez president of the Supreme Court, but the latter indignantly refused.

The Spaniards continue fighting in San Domingo, but of course the niggers are always victorious, and the invaders suffer such heavy losses that in a short time they will be all exterminated in the woods of Montecelli: this news is also imaginary, for nothing positive is known, the Spaniards keeping their operations secret, and all communications cut off.

The small republics of Central Americans are, for a wonder, quiet; but we hear of a revolution in New Granada, the province of Magdalena having seceded, and all the rest were about to follow suit, and form ten new republics out of the old one.

FOREIGN ITEMS PER LAST MAIL.

It is stated in some of the French papers that the Prince and Princess of Wales will visit the Emperor and Empress of the French in November, and that their reception is to be another great event in the social annals of Paris.

The feeling of hostility towards the Court of Spain which has led Prince Napoleon to absent himself from France during the visit of the Consort of Isabella appears to animate, even in a greater degree, the representative of the King of Italy. The Queen of Spain still presistently refusing to recognise Victor Emmanuel as the King of Italy, and still receiving the accredited ambassador of Francis II., King of the two Sicilies, notwithstanding the absorption of Naples and Sicily in the Italian kingdom, M. Nigra, the representative of Victor Emmanuel at the

Tuileries, has determined to withhold from the King Consort of Spain the marks of respect which under other circumstances he would diplomatically pay him, and has gone into Switzerland to join Prince Humbert, who will arrive there about the same time.

The reception of the King of Spain by the Emperor of the French is the chief topic in Paris. The Princess Mathilde, sister to Prince Jerome, would not meet the Bourbon Sovereign, and as it was necessary some explanation should be given of her absence the 'Moniteur' informed the public that she was prevented being present by one indisposition. His Majesty the King Consort of Spain has been received with Imperial hospitality at Versailles, yet but few people attach importance to his visit, because they know he excercises no political weight and his influence at home is small.

It is said that the Emperor of the French is about to pay a return visit to King Leopold at Brussels.

A rumour of the approaching resignation of M. Drouyn de Lhuys has been current in Paris for the past few days.

An important alteration is about to be made in the French law authorising arrest for debt. In future, arrest is to be completely abolished in civil and commercial matters, except with respect to foreigners. It cannot in any case be pronounced against women or against men having attained the age of 60 years; but it may be maintained in administrative, criminal, correctional, or police measures within certain limits.

The Austrian squadron, it is said has received orders not to return to the Adriatic until peace is signed. The Prussian Government has offered to garrison all the districts torn from Denmark with Prussian troops and at the expense of the Prussian Government.

The Emperor of Russia and the King of Prusia are expected to be guests of the Emperor of Austria about the 22nd of this month, when grand military reviews will take place in the presence of those Sovereigns.

Early in the ensuing month the Prince and Princess of Wales will embark at one of the Scotch ports for Denmark. The Channel Fleet has received orders to proceed to Leith and escort their royal highnesses on the voyage. In consequence of this arrangement, the visit of the fleet to the Mersey is deferred.

The German Catholic Church in Joliet, Illinois, was struck by lightning on Sunday, during the service. Five were instantly killed and fourteen severely wounded; three of the latter have since died.

Crinoline has been abolished at the opera in Paris under penalty of a fine. Other French managers are expected to follow the example.

A man in Rochester advertises that he will assassinate Jeff. Davis if the Government will furnish him with six pair of pistols and $500. Probably he wants a transportation train also, to convey his firearms.—*New York World.*

It is asserted that more than one enthusiastic sympathizer wrote to Mrs. Yelverton offering marriage as soon as the decision of the Lords was known.

What California needs most to-day is rain. What she wants to-morrow is 75,000 women to mate off the extra male population, according to the late census.—*California paper.*

An outbreak of the Arabs below Bagdad has led to a renewed suspension of the works in progress for completing the line of Indian telegraph to Kurnah.

Miss Burdett Coutts was the purchaser of the copy of Shakspeare, first edition, sold at Mr. Daniel's sale last week. For this rare volume Miss Coutts gave the enormous sum of £716 2s.

Great suffering prevails amongst the cattle in the extreme southern parts of England, where there is a shorter supply of water than has been experienced for the past forty years.

The marriage returns for 1862, which have just been issued, distinguish the marriage of 28 divorced persons in the year. Ten of these marriages took place in London. Ten divorced men married spinsters, and two divorced men married widows; nine divorced women were married to bachelors, and two divorced women to widowers. There was also another instance, occurring at Birmingham, where a man and women, once husband and wife but divorced, were re-married. The number of divorced persons is increasing, and hence these marriages of divorced persons increase; the number reported in 1862 was about three times as many as in any previous year.

Canadian papers state that the crops have suffered from the drought, but generally the reports are that the yield will be better than was expected. Rain had begun to fall. The woods had become as dry as tinder, and took fire in a great number of places, and in some instances burnt for a week or a fortnight. Some fires reached the fields, and a farmer only saved his barns by ploughing round them. Many towns were full of smoke, and at one time it was so dense in Ottowa that navigation was seriously interrupted.

It is stated that the Duke of Northumberland estates include 3,000 acres of woodland, 116,200 acres of hill pastures and grass land, 38,900 acres of tillage, and 4,700 acres of waste and rock and shore.

Specie was very firm to-day, all the leading brokers buying; it is said, however, that paper money will be in such great demand for the farmers that patacons must decline in price. Every one is waiting for the packet, to know what to do in the way of wool buying; several large lots of wool are offered, but buyers refuse to make contracts.

There is nothing to note in exchange as yet. It is generally believed that it will fall, as good drawers refuse to draw at any save the most advantageous rates. It is rumoured, we know not with what truth, that remittances will be made to Europe in specie this packet, but, unless the rates fall very low, indeed we regard the export of specie as highly improbable.

The Bremen barque Ellida, to load jerked beef for Parana at 5, 6 and 7.

We heard yesterday of a sale of two and a half leagues of land in the province of Santa Fé, on the coast of the Parana, in 350 ounces. The land is very superior, and the purchaser considers he has made a great bargain.

On Monday next, if the weather is fine, over five hundred farmers in the north camps will commence shearing as the carretilla is nearly ripe.

SAVINGS BANK.

BANK MAUÁ AND CO.

No. 103 Calle de Cangallo,

BUENOS AYRES.

The immense advantages of Accounts Current are now so generally felt and appreciated in the two great emporiums of the River Plate, Montevideo and Buenos Ayres that there are very few. Merchants who fail to keep one at the bank in which they place the most confidence.

The Bank of Mauá and Co. in Montevideo has already provided for the working classes in that city a safe and profitable depositary for their savings.

The sums deposited in that most important institution are daily increasing, and already reach a very large amount.

These advantages have not hitherto been enjoyed in this city by an immense number of clerks, artisans, working men, and servants of all classes and conditions, who are equally interested in putting their savings out at interest, thus providing themselves with a reserve fund in case of need, sickness, or old age, instead of spending them in the immoral gambling, in lotteries, and other frivolities.

The Bank of Mauá and Co. of this city, following the noble example of their firm in Montevideo, now offer the same facilities in this city, and will open a Savings Bank at No. 103 Calle Cangallo, from Nine a.m till Three p.m on Week Days, and on Sundays and Holidays from Ten a.m. to Twelve m., for the reception of the savings of the classes already mentioned.

The Bank will deliver to each depositor a pass book, in which will be entered the amount deposited and withdrawn

The depositor is permitted at any time to withdraw the whole or part of the sum deposited; in the former case the interest will be calculated up to date

The Bank of Mauá and Co. is sufficiently known to the Public by the benefit derived from the course of its operations, which are regulated on the strictest and soundest principles, and always directed to promote the general welfare.

The bank of Mauá and Co. are also persuaded that this new branch of their business will render immense service to the working classes of Buenos Ayres and its neighbourhood

Buenos Ayres, September 19, 1865.
